Lens Sets

HASSELBLAD HC

Standing out amongst our arsenal of 65mm rediscovered vintage gems, the Hasselblad HC represents a paradigm shift in modern optical design. These lenses marked Hasselblad's bold entry into the digital age, merging the company's renowned heritage with cutting-edge technology. Leaving behind the remnants of a technical performing, sharp, new medium format lens with pristine image quality and modern performance that stood in a league of their own. Imagine an Arri/Zeiss Master Prime on image circle steroids.

These early 2000s, turn-of-the-century gems represent the modern end of medium format with exceptional sharpness for a hyper-contemporary shooting experience. This is a departure from the vintage charm of the rest of our 65mm collection.

The HC lenses were crafted with digital sensors in mind. This forward-thinking approach resulted in exceptional sharpness, stunning micro-contrast, and a contemporary rendering that sets them apart from the classic, softer aesthetics often associated with older medium format lenses.

For filmmakers seeking the unparalleled resolution and depth of medium format, but who crave the precision and speed of modern optics, the Hasselblad HC lenses offer the perfect solution. They bridge the gap between classic aesthetics and contemporary performance, unlocking a new dimension of creative possibilities.

Experience the evolution of medium format with these rehoused Hasselblad HC lenses. Discover a world where sharpness meets sophistication.
