MEYER OPTIK GÖRLITZ

Meyer Optik Görlitz: Where Dreams Take Focus

Meyer Optik Görlitz, a name synonymous with artistry and innovation in the world of optics, invites you to rediscover the magic of vintage lenses. Founded in 1896, this historic German company has long been celebrated for its unique and character-rich glass, each one a testament to a bygone era of craftsmanship and optical exploration.

Trioplan: A lens that needs no introduction, the Trioplan is legendary for its enchanting "soap bubble" bokeh. This dreamy, almost surreal effect adds a touch of magic to any scene, transforming ordinary backgrounds into mesmerizing tapestries of light and texture.

Biotar: Prized for its sharp rendering and captivating swirly bokeh, the Biotar is a portrait photographer's dream. Its ability to isolate subjects with a creamy, dreamlike quality creates images that are both timeless and unforgettable.

Primoplan: A versatile lens that seamlessly blends sharpness and character, the Primoplan is a true all-rounder. Whether capturing intimate portraits, dramatic landscapes, or everyday moments, this lens adds a touch of artistic flair to any composition.

Lydith: Venture into the world of creative wide-angle photography with the Lydith. This unique lens offers a distinct perspective, bending lines and distorting reality to create images that are both captivating and surreal.
